Problem: CBT is a technique used by most therapists to cure patients out of stress and depression. But it has been observed that people do not wish to seek the help of a psychiatrist willingly. They try to avoid such interactions as much as possible. Thus, there is a need to bridge the gap between a person who needs help and the psychiatrist.

ACTIVITY-4

Problem: People love to indulge in various kinds' food. This is a reason that you find restaurants everywhere. These restaurants serve food in many ways like A la-Carte and Buffets in-order to offer a variety to their customers. All kinds of Food Outlets prepare food in bulk, as they expect a lot of customers would come to enjoy the food every day. For most Food Outlets, at the end of the day, there is a lot of leftover food This food is a waste, as the Food Outlets don't intend to serve stale food to their customer's the nest day, to maintain their brand value. So, every day a specific quantity of food is prepared keeping in mind a probable number of

Expected Customers, which might be more than the actual number of customers who visit. This leads to a good quantity of food getting wasted, everyday wastage if accounted for the whole year.
